GOOD & REESE

Novelties in Flower Seeds for 1930

★ *For florists' Use* ★

Larkspur, Los Angeles:

Los Angeles was developed in response to the demand for a Larkspur of the same growing habit as La France, but with a richer color—something between La France and Rosy Scarlet. For Los Angeles we have the same rich salmon ground, overlaid with a brilliant and pleasing rose. The type of growth is similar to La France, but the foliage of Los Angeles is a much darker green, making the large, double flowers stand out more prominently.

Trade pkt., \$1.00; per ounce, \$6.00.

Calendula, Radio:

This unique new flower is a recent introduction from Europe. The true Radio form is a medium sized orange flower with quilled or comet petals, curled and twisted, borne on medium length stems. It is proving very popular as a florist's forcing variety and for garden planting.

Trade pkt., \$0.50; per ounce, \$3.00.

Gaillardia, Tangerine:

In offering this improved strain of Tangerine we wish to state that while it is greatly improved over the original introduction it is still variable. Nevertheless, there is a very large percentage of the true Tangerine in it and such a color is always in good demand. It may be described as a medium sized flower of various shades of tangerine orange. The color and the general structure of the flower make it very graceful but very wiry and of good cutting length.

Trade pkt., \$0.50; per ounce, \$3.50.

Verbena, Mammoth Golden Queen:

As in Asters, a clear Golden Yellow is very difficult to produce in Verbena but we have, after several years of close application, succeeded in developing Golden Queen. The flowers are of medium size and borne on a vigorous vine that is of an ever-bearing nature. It is one of the earliest of flowers and continues to develop throughout the growing season, making it a very valuable plant for bedding purposes where a good yellow is required. It is the deepest yellow on the market.

Trade pkt., \$0.50; per ounce, \$2.00.

Petunia, Double Large Flowering:

FANCY FRINGED

This mixture has been greatly improved by the addition of a greater variety of pleasing light and dark Pinks, Carmines, etc., with the flowers much larger than in past seasons. We highly recommend this mixture for Florists, and general use.

Trade pkt., \$1.50; 3 pkts. for \$4.00.

Petunia, Dwarf California Giants:

RAMONA STRAIN

By far the best strain of Giant Petunias for pot culture. We have checked this type against many in our experimental grounds this season and consider it the most compact Giant Petunia with the largest and best formed flowers of any dwarf type of Petunia on the market today. When in full bloom the plant shows nothing but large, colorful flowers with open throats well marked and veined. Wherever this strain has been tested it has proved all that we say of it.

Trade pkt., \$1.00; 3 pkts. for \$2.75.

California Sunshine Asters:

The Sunshine type was introduced into this country a few years ago and became quite popular because of its dainty appearance. It was accepted by florists as very desirable, but met with one objection—the flowers were borne on too short and weak stems. After several years of hybridizing and special selection, we are now pleased to offer a strain which fills the special requirements of florists, and makes a better strain for general use. California Sunshine Asters retain their dainty appearance but are larger and are borne on long, stout stems, and the plant has the general appearance of being as robust as the Giant Washington or the Upright Branching types. The stems measure two to two and a half feet, while those of the earlier type measure about one and one-half feet. We consider California Sunshine a distinct improvement on the original Sunshine. We offer the following colors: Flesh, pink, carmine, lavender, and violet.

Trade pkt., \$0.50; per ounce, \$3.00.

Paeonia Chinensis

Hand selected seed from the best double flowering varieties. G. & R. Peony Seeds are undoubtedly the finest ever offered.

Trade pkt., \$0.50; 3 pkts. for \$1.25.

These offers are intended for the Trade ONLY.

ALMA MATER (H. T.)—Introduced by Good & Reese Co. and named in honor of Wittenberg College. A pink rose of great beauty and form. Splendid grower, free bloomer. A sport from Columbia, lighter in color than the parent. The sea shell pink deepening in center of bud gives a charming effect.

Rose Hill

JOHN C. MENSING (H. T.)—A most promising rose from Holland. Bright pink shaded golden, large petals averaging thirty to the bloom. A rose of extreme brilliancy.

JOHN RUSSELL (H. T.)—A very fine dark crimson rose with blooms of a good shape and stiff, strong petals. M. Baslea, who saw it growing in the raiser's nursery, tells us it is quite one of the best roses of recent years.

JOSEPHINE VESTAL (H. T.)—A Rose of attractive coloring. Color is so difficult to describe that any description can only be a partial one, and gives but a faint idea of the superb beauty and richness of the shades. It might be described as salmon-flesh, tinted rose, with a touch of yellow at the base. Its fragrance fills the room. Ranks one of the best of the garden Roses. Hardy in almost all localities.

LA CHAMPAGNE (H. T.)—A meritorious and distinct variety of strong, robust habit, with large, long buds of beautiful shape, which develop into good full bloom, color bright chamois, shading to yellow with apricot at center and peach-blossom reflex and yellow base.

LADY DIXON HARTLAND (H. T.)—Bud long-pointed; flower opens well, high center, fragrant, deepest salmon at center shading to pale pink on outer petals. Abundant, continuous bloomer.

LADY MARGARET STEWART (H. T.)—Another Gold Medal winner at the Show of The National Rose Society. Long pointed buds of a deep surfloer yellow, veined with orange scarlet as the flower opens. These colors intermingle, forming a beautiful cadmium orange effect, with a very pleasant odor.

LORD CHARLEMONT (H. T.)—Bud very long-pointed; flower large, full, high centered, perfectly shaped; clear crimson, deepening to carmine-crimson; strong fragrance.

LUCIE NICHOLAS MEYER (H. T.)—Bud large, flower large, double, globular, very lasting; dark pink, lighter at the edges; borne singly and severally, on strong stem; moderate fragrance. Foliage glossy green. Disease resistant. Blooms continuously.

LUCINDA (H. T.)—A very fine sport from Columbia. The color is a very even bright rose and the open bloom has a gracefully rounded form which is a delightful surprise.

LUCY FERDINAND DAVID (H. T.)—Long-pointed bud, flower large, full cupped, very fragrant. Pure white with slightly cream center, borne on strong stems.

MARCIA STANHOPE (H. T.)—Bud large, globular, streaked slightly with carmine; bloom large, double, globular, very lasting; pure white, strong fragrance. Foliage disease-resistant. Profuse bloomer. Hardy.

MARIE GOUCHALT (New.)—A pink form of the well known forcing variety, Eugene Jacquet; dainty pure pink flowers in great abundance. A fine forcing climber.

MATCHLESS (H. T.)—Bud very large, long-pointed, deep cerise pink; flower immense, full, very double, intensely strong fragrance, lasting well, uniform cerise pink, borne singly on long strong stem. Growth very vigorous.

MONS. JULIEN POTIN (Golden Pernet) (H. T.)—Unquestionably the most gorgeous and brilliant Rose yet introduced. A rich golden yellow which grows deeper as the flowers mature. The buds are long and shapely and develop into large full flowers of beautiful form, sweet scented. Strong upright growth, attractive glossy bronze-green foliage; very free flowering.

MRS. C. W. EDWARDS (H. T.)—Bud large, long-pointed; flower very large, double, high centered; pure crimson-carmine, yellow base, on the outside of the petals the yellow bases run into veinings of yellow; moderate fragrance. Profuse and continuous bloomer. Hardy.

MRS. F. R. PIERSON (H. T.)—An exceedingly fine sport from Premier. The color is a perfect scarlet crimson.

MRS. J. C. AINSWORTH (H. T.)—Pale pink, shaded mauve and white, well formed and fragrant. Plant strong and free in bloom.

MRS. A. R. BARRACLOUGH (H. T.)—Gold Medal winner of the National Rose Society. Color a sparkling carmine pink of an even tone passing to yellow at the base of the petals. The color does not fade as the flower ages but appears to become brighter. Long perfect bud developing into a full double flower of large size, very fragrant.

MRS. WILLIAM C. EGAN (Per.)—Strong healthy grower, with long, pointed buds which develop into flowers of good shape. In color, it is a two-tone pink, the reverse of the petals a soft light pink, the interior deep flesh color with a golden line at the base of the petals; the flowers are carried on long stiff stems, and last in good condition for an unusually long time, either cut or on the plant; an exceptionally free and continuous bloomer.

NEW COLUMBIA (H. T.)—Sport of Columbia. Flower true pink, deepening to glowing pink—a little lighter than Columbia, with outer petals reflexed, allowing the bud to open better. All other characteristics like Columbia.

NILES COCHET (The True Red Cochet.)—Red changing to deep rose.

PADRE (H. T.)—Coppery-scarlet with bright yellow at base of petals. Semi-double with 15 to 20 petals, often curiously notched, strong erect grower exceptionally free flowering.

RAPTURE (H. T.)—Sport from Ophelia (a very striking sport and fancy colored rose). It is intensely brilliant with its coloring of bright apricot, coral, rose, and gold and blooms very profusely.

RED PREMIER (H. T.)—Sport of Premier. Bud large, pointed; flower large to medium, double, full, high-centered; bright carmine; borne singly on strong stems of medium length; very fragrant. Foliage abundant, large leathery rich green; disease resistant.

REV. F. PAGE ROBERTS (H. T.)—A fine rose of a vigorous habit, with good shaped blooms, which are carried erect on long stiff stems, and are very sweetly scented. The color is an orange-yellow, becoming lighter at the edges of the petals. It is an excellent exhibition and garden rose.

Climbing Polyanthas

CLIMBING MADMOISELLE CECILE BRUNNER (C. H. P.)—Rosy-pink on a rich creamy-white ground; a beauty. This is the strongest growing Rose offered in this catalog, bearing none.

PHYLLIS BIDE (Cl. Poly.) (Mult.)—Very pretty perpetual-flowering Polyantha variety of fairly vigorous habit, the plant growing to a height of about 6 feet. The blooms, which are produced in loose sprays, are almost double, the color pale gold, tipped with pale pink. New.

RED EXPLORER (Cl. Ev. Bl. Poly.)—This is the grade of acquisition to the climbing everblooming Polyantha class of rose; that has ever been introduced. It is almost continuous in bloom; blooming from all new growth as fast as it appears. Fi-erich red in color. New.

Moss Roses

What can be more elegant than the bud of the Moss Rose and more delicious than its fragrance. Perfectly hardy.

ELIZABETH ROWE—This is an old favorite with its large deep pink buds well mossed. A beauty.

HENRI MARTIN—Large, full flower of deep red; well mossed; fragrant.

MOUSSELINE—Pure white flower, buds heavily and beautifully mossed.

PRINCESS ADELAIDE—Deep blush-pink with buds that are thoroughly mossed.

Cherokee or Laevigata

AMOENA, The Pink Flowering Cherokee Rose (L.)—The flowers are the same as the White Flowering Cherokee, except that the color is a glowing pink with a golden yellow center. Resembles huge apple blossoms.

Wichuraianas

WICHURAIANA, or MEMORIAL ROSE (W.)—It is difficult to conceive anything more appropriate for covering graves and plots in cemeteries than the Hardy Memorial Rose. It creeps along the ground as closely as an Ivy. They are single, pure white, with a golden-yellow disc, five to six inches in circumference.

Petunia Pink Triumph is a florist's money-maker.

ALIDA LOVETT (H. W.)—Both buds and flowers are large; of ideal form, are held on stiff stems a foot and a half to two feet long and the color is a lively bright shell-pink with shadings of rich sulphur at the base of the petals. The flowers are of remarkable substance and long-lived, whether cut or left to remain upon the plant, and are pleasantly perfumed.

AMERICAN PILLAR (H. M.)—A single flowering variety of great beauty. The flowers are of enormous size, three to four inches across, of a lovely shade of apple-blossom pink, with clear white eye and clusters of yellow stamens. These flowers are borne in immense bunches, and a large plant in full bloom is a sight not easily forgotten.

AVIATEUR BLERIOT (H. W.)—Saffron-yellow, center golden-yellow; full and double, flowering in clusters.

BESS LOVETT (H. W.)—Resembles Climbing American Beauty in shape of bloom, but is very much brighter in color and much more fragrant. The flowers are clear bright red, of good size and of double, full, cupped form, lasting a long time in good condition. Beautiful in bud and bloom and the most fragrant of the Climbing Roses.

BIRDIE BLYE (Heart of France.)—Its bright satiny-pink blossoms—quite cup shaped with fragrance in the cup. You'd enjoy this Rose planted where it could grow to 3 to 4 feet and please you with weekly bouquets.

BONNIE PRINCE (H. W.)—Bud small long-pointed; flower medium size, cupped, double, fragrant, white with tinge of yellow in center, borne in clusters. Very vigorous climber, profuse bloomer in June and occasionally thereafter. Very hardy. Deep red hips on-half inch in diameter.

CHRISTINE WRIGHT (H. W.)—The flowers are double, from three and one-half to four inches in diameter, borne singly and in clusters, of perfect form, beautiful in the bud, and in the fully expanded flower; in color a most refreshing bright wild-rose pink.

CLIMBING AMERICAN BEAUTY (H. W.)—Same color, size and fragrance as American Beauty, with the addition of the climbing habit. Good foliage and better blooming qualities. One plant of this new Rose will produce twenty times as many flowers in June as the old American Beauty.

CLIMBING WHITE AMERICAN BEAUTY (H. W.)—A hardy disease-resistant variety; vigorous growth and great freedom of bloom. It is much more double than Silver Moon, with but one flower to a stem. Has excellent keeping qualities.

CRIMSON RAMBLER (C. P.)—Bright crimson flowers produced in large clusters of pyramidal form; grand variety for pillars and arches and to train over porches; also makes a fire attractive hedge.

DOROTHY PERKINS (H. W.)—A most beautiful deep pink; the flowers are borne in large clusters of small double blooms and are very sweetly scented; quite first class.

DR. HUEY (H. W.)—Bud medium size; semi-double; borne in clusters of 3 or 4 on good stems; lasting. Color, dark crimson-maroon, of great brilliancy; stamens and anthers light yellow. Blooms continuously for three weeks.

DR. W. VAN FLEET (H. W.)—Flowers when open run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkable delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center.

EMILY GRAY (H. W.)—A new yellow climbing Rose with glossy, undulated holly-like foliage. The buds are long and flowers of golden yellow are large and semi-double. A valuable acquisition. Needs winter protection north of Washington, D. C.

EUGENE JACQUET—The earliest and most profuse flowering of all the climbers and of the easiest cultivation. Almost every eye produces a handsome truss of fragrant, cherry-red flowers. Eugene Jacquet can be bloomed in February without difficulty. It flowers a week earlier than Tausendschoen or Roserie under the same conditions and carries handsome, dark green, mildew resisting foliage. It holds the flower unusually long—the color improves with age. Eugene Jacquet should be forced so as to show color ten days before Easter to be at its best for Easter sales.

GARDENIA (H. W.)—Bright yellow, cream color when open; very fragrant and free; early flowering. This is the hardy Marechal Niel; double yellow flowering.

HIAWATHA (H. W.)—Its flowers are about one and one-half inches across, and produced in long, pendulous sprays, with frequently from forty to fifty flowers on a spray. In color, it is brilliant ruby-carmine, with a clear white eye and a mass of golden stamens.

JACOTTE (H. W.)—Bud large, orange and yellow; flower large, semi-double, open, cupped, very lasting; deep coppery yellow tinted coppery red; borne, several together, on long, strong stem; fragrant. Blooms profusely in May and June.

JEAN GIRIN (The ever-blooming Dorothy Perkins.)—The flowers are similar in form and color to the pink Dorothy Perkins. The chief merit of this rose is that after giving a mass of bloom in June, unlike the other climbers, it blooms again. Cut off all of the old June blooms to help the plant produce more flowers during the summer and fall.

LADY GAY (W.)—Flowers of a deep cherry-pink, shading on the edge of the petals to a very delicate soft tone of pink.

MARY LOVETT (H. W.)—In this Dr. Van Fleet has brought out another Wichuraiana Hybrid a "White Dr. Van Fleet." This rose has done well and is strongly recommended. Loses foliage early.

MARY WALLACE (H. W.)—This is Dr. Van Fleet's master-piece. Blooms two or three times during the summer months. A pillar rose supporting itself in a bushy growth 6 to 8 feet high. Bright clear rose-pink with salmon at base of petals. The largest Hybrid Wichuraiana in existence. Seen this year in all its giant loveliness.

PAPA GOUCHAULT (H. Cl.)—A pure crimson red, holding its color under all weather conditions and exceedingly hardy.

PAUL'S LEMON PILLAR (Cl. H. T.)—Pale lemon buds and faint sulphur yellow flowers. Double, well formed and fragrant, strong grower.

PAUL'S SCARLET CLIMBER (H. W.)—Vivid scarlet, shaded crimson, makes a brilliant display for a long period of time in the garden. A wonderful climbing Rose. We consider it the most wonderful hardy Climbing Rose.

RED DOROTHY PERKINS, or EXCELSA (W.)—Ornamental climber which is nearly evergreen; this will assure this lovely pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces clusters of flowers. The color is deep rosy-red, the tips of the petals tinged with scarlet.

ROSERIE (Pink Tausendschoen)—This is a bright pink form of Tausendschoen. A grand Rose from any standpoint.

SHOWER OF GOLD (H. W.)—The color is a deep golden-yellow, with orange shadings in the center. This fills the "long felt want" for a "Yellow Rambler."

SILVER MOON (H. W.)—Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness.

TAUSENDSCHOEN, or THOUSAND BEAUTIES (H. M.)—The flowers upon first opening are the most delicate shade of pink ever seen in a Rose, might be described as a white, delicate flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring.

THE BEACON (H. Cl.)—Fiery red with distinct white eye.

VEILCHENBLAU, THE BLUE ROSE (H. M.)—This is a much better Rose than some give it credit for. It opens a reddish-violet, quickly changing to violet-blue.

WHITE DOROTHY PERKINS (W.)—White Dorothy Perkins' in every way is the equal, if not superior, to Crimson Rambler, as a red, and Dorothy Perkins as a Pink. This Rose has no rival as a white climber.

THE GOOD & REESE COMPANY.

We recommend and use Volck, the most effective insecticide.

VOLCK, Effective, Safe and Easy to Use

Controlling plant pests successfully demands a spray that will not only effectively control pests such as Red Spider, Mealy Bug, Scale, White Fly, and Aphis, but at the same time be safe to use on tender plants. Safety is particularly necessary on tender green-house and garden plants. Volck answers these requirements and fewer applications will get results.

Volck is also a pleasant spray to handle and mixes easily with water.

4 inch pots.....	3.25	25.00	225.00

TEDDY JUNIOR (The Fern for Every Household)—The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot.

JOHN WANAMAKER ("The Wanamaker Boston Fern")—A "sport" from Nephrolepis Scholzeli, with longer, narrower, gracefully drooping fronds. It is not so compact in growth as Scholzeli, and, therefore, does not decay in the center, and is a durable house Fern. It is a rapid grower; making an abundance of fronds, and is quite distinct from any other Nephrolepis.

ROOSEVELT—The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants.

WHITMANII (The Ostrich Plume Fern)—The well-known fluffy leaved fern; a popular florists' variety.

WHITMANII COMPACTA ("The Parlor Fern")—This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent—the pinnae subdividing, making miniature fronds which are super-imposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description.

SCHOLZELI ("The Crested Fern")—The fronds, like Scottii, stand erect, and with a graceful larch form a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow.

BOSTONIENSIS ("The Boston Fern")—A variety that needs no description. Still the most popular of all varieties.

DWARF BOSTON—The most popular of present day ferns. A dwarf type of the popular Boston variety.

GOODI ("The Baby's Breath Fern.")—(Good & Reese.) This Fern is splendid to use for fern dish planting. The finest foliage of all the ferns. Fronds very fluffy. A well-grown specimen is in great demand. It is of easy culture.

SCOTTII ("The Newport Fern.")—It is a rapid grower and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite.

Geraniums

No plant lends itself to such general usefulness as the Geranium. For pot work and bedding it is unsurpassed. We carry at all times immense quantities of this indispensable florist's plant but have sold out early the past few seasons. Make your reservations early.

Irvington Beauty (New): Since introducing this beautiful new Geranium in 1927, the demand has constantly exceeded the supply. It is the most prolific of all Geraniums, flowering earlier and later than all other varieties. Of branching habit, every branch producing an immense truss of rosy salmon pink flowers. It is not unusual for a four-inch pot plant of Irvington Beauty to show five to seven flower heads at one time. Every progressive florist should grow Irvington Beauty for increased profits. **2 1/4 inch pots, \$1.35 per 12, \$10.00 per 100, \$90.00 per 1000.**

Fiat—(The True Variety): No Geranium has ever been so favorably received as Fiat. Since introduction, it has been in greater demand than any other variety. For that reason, some growers have sent out Landry, Improved Poitevine and others under Fiat label. We have the true stock of Fiat, and will have the largest supply in the country this year. Florists who are not growing Fiat are missing the most brilliantly colored of all Geraniums. Of good growth, and an intense dark salmon pink in color. Bigger profits are being made in growing Fiat than with any other Geranium. **2 1/4 inch pots, \$1.35 per 12, \$10.00 per 100, \$90.00 per 1000.**

Double Flowering Varieties, 2 1/4 inch Pots

Price except as noted.
85 cents per 12, \$6.00 per 100, \$55.00 per 1000.

Alphonse Ricard:

Still the most widely used of the red varieties. For pot work and outside planting Ricard is unsurpassed. Large trusses of brilliant vermillion.

American Beauty:

Of the same color as the famous American Beauty Rose. A very free bloomer, and excellent for forcing.

Aurora: Growers who are not growing Aurora are missing one of the finest Geraniums. We consider it distinctly superior to Poitevine because of its better growth and brighter color. A very prolific variety with flowers of beautiful salmon pink.

Beaute Poitevine: For many years Poitevine has ranked as the leading pink Geranium. In color, beautiful shrimp pink. One of the best for pot work.

Comtesse De Harcourt: One of the two best white Geraniums. The large trusses of pure white flowers hold the color in excellent shape.

Helen Michell: The universal favorite where planted. Helen Michell cannot be surpassed in either pot work or outside planting. Enormous trusses bear brilliant scarlet flowers that do not fade in the sun.

Jean Viaud: One of the older favorites that is still used by many growers. The color is rich deep pink, shading to light pink near the base of the petals; the base of the upper petals being creamy white. Jean Viaud is a remarkably good Geranium.

La Favorite: In this Geranium we have the finest double white in cultivation. The flowers are borne in large trusses of the purest snow white, retaining this pure whiteness even in the height of summer. For winter blooming La Favorite is excellent. Your profits will increase by using this favorite.

Madame Barney: A very profuse bloomer, the individual florets being of very large size. The color is pure deep pink. Considered the perfect bedding Geranium.

Madame Landry: The salmon pink Geraniums have been in constant demand for the past five years. We have never been able to grow enough of Madame Landry to supply the demand. The color is dazzling salmon pink with a slight scarlet shading. The flower heads are large and carried on long stems.

Marquis De Castellane: Of splendid growth, the color being deep solferino red. This shade is decidedly bright and unique for a Geranium. Some growers consider Castellane the leading variety.

Marquis De Montmart: Commonly known as the Blue Geranium. In color a rich soft purple, a very striking color. Of good growth.

Mrs Richard Gloede: A very good new Geranium that is being grown more widely each year. The color is similar to American Beauty but more brilliant. Of good branching growth. **\$1.25 per 12; \$8.00 per 100.**

Radio Red: The most intense scarlet in cultivation. The color is so brilliant that it instantly commands attention. Radio Red is fast becoming the most widely used red variety. It is the best red Geranium. **\$1.00 per 12, \$7.00 per 100, \$65.00 per 1000.**

Red Barney: A new variety of brilliant red that is very prolific. For pot forcing it is among the leaders. Of good branching habit.

S. A. Nutt: The darkest and richest Geranium grown. It is deep velvety maroon in color, an excellent bedder and a perfect pot plant. No other Geranium has ever equalled the richness of its coloring.

Easter Greeting: Florets fiery amaranth-red, with five large, regular shaped spots.

Gardener's Joy: The ground color is apple-blossom pink, the two upper petals have blotches of carbon-brown, the florets are three and one-half inches in diameter and are joined to enormous clusters which rise above the beautiful foliage and remind one of a Rhododendron cluster.

Lucy Becker: This grand novelty is a sport of Easter Greeting, and is like it in everything but color which is a rosy-pink.

Prince: Immensely large flowers, strongly crimped of fine shade with from six to ten petals; color rich purple with velvety black blotches. Remarkably robust habit. The large clusters rise gracefully above the beautiful foliage. The blooming plant with its enormous flowers makes a striking impression.

MRS. LAYAL (Pansy Geranium)

Rather dwarf in growth, and resembling the purple pansy. We offer select plants of this florist's variety.

The New and Better DAHLIAS

Green Plants in 3 inch Paper Pots. Will give better results than tubers.

No flower has been so materially improved in the past ten years as the Dahlia. To compare the new varieties with flowers ten to thirteen inches across with the older types is a revelation to the average grower. Florists who are not growing the new and better varieties are neglecting a big opportunity for increased profits.

We are growing a very complete collection of the new varieties, selecting each year only those which show decided commercial merit and improvement. Each one of the new varieties listed is an improvement over anything yet introduced. Compare our prices with those of reliable growers—and place your order today.

Mark Hanna (Good & Reese, 1930.)—A new decorative Dahlia that is without question the best red Dahlia on the market today. No Dahlia in our fields has ever attracted more attention, and elicited more worthy comment, than Mark Hanna. The flowers are of the same shade as the popular Ricard Geranium—brilliant vermilion red. The plant is sturdy and of tall growth. Mark Hanna easily attains a diameter of 12 to 13 inches across when properly grown, and with perfectly full center. Mark Hanna is a Dahlia that is destined to rank among the world's finest. It is the par excellence of red Dahlias. **\$7.50 each, \$75.00 per 12.**

JANE COWL (Decorative) —No Dahlia, except Jersey's Beauty, has ever been in such great demand. We give the introducer's description. "Just imagine the Ideal Dahlia bush—fairly tall, with vigorous dark green, leather-thick foliage. Give it stems that are straight and strong, yet not clumsy. Then add monster blooms of glistening bronzy buff and salmon shades—blooms that will stop you every time you are near them, and you have a mental picture of our own Jane Cowl." Jane Cowl is held on the stem just as it should be—looking at you and slightly up. Some blooms are even set squarely on top of the stem, Insulinde fashion. The flowers are immense, of the full petaled decorative type, with just enough twist to the broad petals to add the touch of refinement. Continuing its sensational success as a seedling, Jane Cowl won more prizes last season than any other 1928 introduction—including in its triumphs at least two foreign countries. It has been called the world's "most perfect Dahlia."....	2.00	20.00	150.00

One of the best of the new Dahlias....	.40	4.00	27.50	240.00

MARGARET WOODROW WILSON (Decorative) —An exhibition decorative, large, and of great beauty. The pink on the reverse of the petals, reflecting on the white face gives an exquisitely opalescent effect. Excellent for cut flowers.35	3.50	25.00	220.00
MARMION (Decorative) —Immense blooms of golden yellow with a bronze suffusion, and a deeper bronze in the full, high center. One of the largest decorative varieties, of excellent formation. Its long, straight stems and good plant may be classed with the best. This is one of the highest scoring varieties and has won many awards.35	3.50	25.00	220.00

SILVERADO (Cactus) —Silverado is the most strikingly beautiful Cactus variety we have ever grown. The immense blooms are white, gradually shading toward the center to a delicate silvery lavender. The stems are extra long and the well-branched bushes are always covered with blooms. By all means, grow Silverado.	1.00	10.00	75.00
WACHUNG SUNRISE (Decorative) —This remarkable Dahlia for two years in succession created sensational interest at the American Dahlia Society Shows in New York. A huge decorative of golden amber, with reverse of petals showing rose pink. Each petal has a narrow, clear margin of rose pink. It is not only one of the unusual Dahlias in color, but in form as well. The flower is large and deep, with the back petals curving almost to the stem. The stems are strong and sturdy, holding the flowers erect and well above the foliage. Wachung Sunrise is a sensational Dahlia.	2.00	20.00	150.00
WALDHEIM SUNSHINE (Decorative) —Another of the large varieties. A huge, deep golden yellow decorative, with twisted, wavy petals, that relieve the immense size from stiffness. Waldheim sunshine is considered one of America's best Dahlias.	4.00	40.00

Well Pleased With Our Plants

Gentlemen:

Akron, Ohio, May 10th, 1929

A New Introduction!

The KOREAN CHRYSANTHEMUM

Chrysanthemum Coreanum

A REMARKABLE new perennial of iron-clad hardness from Korea, forming fine large clumps 2 to 3 feet in both diameter and height. The large white flowers have golden centers, resembling a glorified Oxeye Daisy, the petals often turning to a light claret pink.

It blooms in the greatest profusion in early October to early December. Of easy culture, thriving in any good garden soil. We believe the Korean Chrysanthemum possesses exceptional possibilities for cutting; there is nothing quite like it for the late fall.

Excellent plants from 2½" pots (will flower first season)

\$1.75 per 12, \$12.00 per 100, \$100.00 per 1000

TRITOMA PFITZERI

Red Hot Poker

No flower is more strikingly beautiful than the Tritoma. For summer and fall cutting it is being used very profitably. Every florist should plant freely of this noble perennial. We offer strong field grown divisions of the true Pfitzeri type.

\$1.75 per 12, \$12.00 per 100, \$100.00 per 1000.

Hardy LILIES

LILIUM GIGANTEUM

The flowers are delightfully fragrant, pure waxy-white, of great substance, and if cut as soon as they are open or partially open then can be kept for two weeks. A succession of bloom can be kept up from November to May by bringing the pots of rooted bulbs in from cold frames at intervals. As a garden Lily it is of great beauty, being entirely hardy except in Northern climate, where it requires a protection of leaves or litter to the depth of five or six inches.

\$2.40 per 12, \$18.00 per 100

LILIUM REGALE

(Regal Lily)

Flowering size bulbs.

\$2.25 per 12, \$15.00 per 100

CALIFORNIA GROWN BOXWOODS

Ready April 10th and Later.

We offer an exceptionally fine stock of perfectly trimmed plants, grown expressly for us by California's leading boxwood growers, The Roy. F. Wilcox Co. The variety used is Japonica, undoubtedly the hardiest of the boxwoods. Each size is offered either balled or burlapped, or in California Redwood Tubs painted green. Do not confuse these tubs with the White Cedar Tubs ordinarily used—California Redwood is considerably superior.
